# Civil Aviation Carbon Neutrality Open Course

# Civil Aviation Carbon Neutrality is a comprehensive 2-day training programme to understand how Aviation will face the biggest challenge of its history.

Dedicated to any professional working in the aerospace business, from industry newcomer to Executives, the course objectives are the following:

- Understanding the current state of Civil Aviation regarding Climate Change.
- Describing the current challenge to reach Carbon Neutrality by 2050.
- Explaining the aviation path to carbon neutrality through the 4 pillars of decarbonisation.
- Explaining the challenges around aviation decarbonisation communication.

The course includes a digital Airline Business simulation, immersing participants in a competitive environment, to illustrate the challenge of reducing CO2 emission while maintaining profitability.

This course has been developed in collaboration with 9 companies from the Aviation value chain to ensure user centricity and to reflect the challenges of all sides of the industry.

**Welcome to the first programme designed by the ecosystem, for the ecosystem.**

Civil Aviation Carbon Neutrality - Open Course  
Training Journey

PRE-WORK *(three online modules of approximately 45 mins duration)*

Introduction to Sustainability	Framework & Regulations	Evaluation & Measurement
--------------------------------	-------------------------	--------------------------

DAY 1

Introduction	Why we Focus on CO2	Climate Change and Aviation	Lunch Break	Technology Improvement	Operations & Infrastructures	Sustainable Aviation Fuel
--------------	---------------------	-----------------------------	-------------	------------------------	------------------------------	---------------------------

DAY 2

Market Based Measures	Calculating our CO2 footprint	Simulation Round 1	Lunch Break	Simulation Round 2	Communication Challenges
-----------------------	-------------------------------	--------------------	-------------	--------------------	--------------------------

## What our customers say about it

---

“The course gives a broad understanding of current state and directions the civil aviation is engaging to decarbonise the sector.

Many different aspects with trainers who are clearly passionate about the subject”

“Now I feel confident to talk about this subject, and I want my team to be as confident as I am right now”

“This 2-day training has now given my colleagues and I further inspiration on where we want to take our decarbonisation and net-zero work going forwards”

“Fact based and given by experts that understand the subject matter”

“The simulation is certainly very instructive”

“Efficient overview of sustainability initiatives and challenges in civil aviation. Opportunity to exchange with different stakeholders and understand their initiatives and challenges”

If you want to

1

Be more confident in addressing the topic of decarbonisation

2

Know more about the biggest challenge of Aviation

3

Learn about how your peers are addressing it

# Civil Aviation Carbon Neutrality
